Angelos Onsy Adly Abdelmalak

Frontend Developer

01557586883 | angelosonsy@gmail.com | Assiut, Egypt | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Frontend developer with a hands-on foundation in HTML5, CSS3, and JavaScript, plus Bootstrap and Sass for building responsive, cross-browser, mobile-first interfaces. Shipped and maintained live sites for real businesses, including a full clinic-management system with a Supabase (PostgreSQL) backend and a restaurant ordering site in production use. Comfortable with Git/GitHub, clean code, and debugging. Currently building on React fundamentals through coursework, with the underlying component-based concepts transferring directly to frameworks such as Vue.js.

TECHNICAL SKILLS

Core Technologies: HTML5, CSS3, JavaScript (ES6+)

Styling & Responsive Design: Bootstrap 5, Sass, Mobile-first responsive layouts, Cross-browser compatibility

Development Tools: Git & GitHub, VS Code, browser DevTools (debugging & testing)

Backend & Integration (applied): Supabase (PostgreSQL database, authentication, REST-based client integration) — used in a production project

Currently Learning: React (coursework/exercises); npm/Node.js fundamentals and Vue.js — concepts transfer from React's component model

PROJECTS

Taj Dental Center — Clinic Management System — Live | Code

Full web system built for a real dental clinic in Assiut: a public booking site plus a role-based admin dashboard (doctor/assistant). Booking logic validates closed days, daily capacity, and open/closed status in real time. Admin side manages patients, multi-service visits with automatic revenue calculation, daily/monthly financial reports, and permissions — backed by Supabase (PostgreSQL) across 10 linked tables.

HTML5, CSS3, Bootstrap 5 (RTL), JavaScript (ES6+), Supabase (database, auth, REST client), Netlify.

Koshary Hekaya — Restaurant Ordering Site — Live | Code

Live ordering site for a real restaurant in Assiut, covering browsing, cart, and checkout. Dynamic menu filtering by category/branch, a persistent cart (localStorage), branch-based delivery pricing, and a full checkout → payment → confirmation flow, plus Google Maps integration.

HTML5, CSS3, vanilla JavaScript, LocalStorage API, responsive design.

Treasure Game (لعبة الكنز) — Live

Browser-based team puzzle game: players pick a group, unlock stages with a password, and solve logic and emoji-based challenges; includes an admin reset control.

HTML, CSS, JavaScript.

EDUCATION

Assiut University — Faculty of Law, Graduated 2025

COURSES & TRAINING

CS50 · Python · HTML & CSS · JavaScript · Bootstrap · Sass · React (coursework/exercises)

LANGUAGES

Arabic — Native | English — Fluent
